What This Means To Us

Introduction

Bright Coffee Shop is positioned for strategic growth, driven by its diverse product portfolio and expanding customer base. Our diverse range of products include freshly brewed coffees, specialty drinks, teas, pastries, and light meals, we cater to a wide range of consumer preferences throughout the day. Operating from multiple locations, our business caters for early-morning commuters, afternoon leisure customers and evening diners, ensuring consistent demand across time periods.

Our sales data reveals strong revenue potential, with coffee beverages and bakery items driving the highest performance. By analysing product trends, sales volumes, and peak hours, we can optimize our product mix, enhance underperforming categories, and unlock new revenue opportunities. Through data driven strategies, targeted marketing, and operational efficiency, Bright Coffee Shop is well positioned to expand its market presence and maximize revenue.

Tea

Coffee

Bakery

Revenue Analysis | Regional and Product Performance

- Hell's Kitchen generated the most revenue, contributing 34% to the total revenue, followed by Astoria and Lower Manhattan, each at 33%.
- Lower Manhattan shows stronger sales efficiency, generating more revenue at lower sales volume.

- Hell's Kitchen and Astroria can study and adopt Lower Menhattens sales strategy to boost revenue efficiency.

Revenue Analysis | Regional and Product Performance cont...

- Coffee is the highest-performing product across all the stores, contributing 38.3% to the total revenue, followed by tea at 28.1 % and Bakery at 12%.

- Sales promotions can be implemented to lower performing products such as flavours and chocolate products to boost sales, making them complementary products at a lower cost.
- Branded sales can be increased by implementing reduced percentage cost promotions when buying high performing products.

Revenue Analysis | H1 Regional Revenue

- There is a gradual increase in revenue.
- 50% increase from January to June.

Revenue Analysis | Datetime performance

- Mornings from 7am to 10am drive the highest daily revenue, contributing 45% to the total revenue.
- Consistent revenue is observed throughout the rest of the day with a drop at night time.

- It is recommended to increase staff between 07:00 and 10:00 to handle peak traffic, reduce queues, and deliver quick service. This will boost customer loyalty and maximize revenue during the most profitable hours.
- Reduce staff after 10:00 while maintaining enough coverage to ensure consistent service and align labor costs with sales volume.
- Leverage on peak morning hours (07:00–10:00) with targeted promotions to boost average spend, strengthen customer loyalty, and maximize revenue during the most profitable period.

Revenue Analysis | Product type per sales volume

- Coffee and Tea are the main revenue drivers, with strong unit sales and generating the most revenue.
- Bakery and Chocolate and other categories serve as complementary products, generating lower revenue per unit sold.

Revenue Analysis | 10 Best Selling Products

- The 10 best selling products contribute to 79% of the total revenue
- Coffee and Tea are the main revenue drivers, they dominate the top 10 best selling products.

- Targeted Promotions—Introduce strategic promotions focused on the top 10 best sellers, such as bundle deals (e.g., coffee + pastry), loyalty discounts, or limited time offers. This will encourage customers to spend more per transaction and strengthen their connection with our core products.
- Cross Selling Opportunities—Position complementary items alongside best sellers to increase basket size. For example, pairing bakery items with beverages or offering small add-ons can drive incremental sales.
- Time Based Promotions—Leverage peak hours (07:00–10:00) to run exclusive promotions on top products, maximizing visibility and reinforcing the products that customers already favour.

what this means to us

Bright Coffee Shop is driven primarily by Coffee and Tea, which together generate the majority of revenue, while Bakery, Chocolate and other categories play a supportive role. Hell's Kitchen is the strongest performing store, overall sales across the stores have doubled from January to June, showing strong growth momentum.

Bright Coffee Shop continues to uphold its strong reputation through the consistent delivery of high-quality products and exceptional customer service across all its stores. This commitment is reflected in the consistent performance observed throughout the operating days, demonstrating the brand's ability to meet customer expectations consistently, with mornings between 7–10 AM being the most profitable period, highlighting both stability and clear opportunities.

These insights mean we can focus on strengthening our core products, replicating best practices from top performing stores, and maximizing peak hours with targeted promotions. This positions the business not only for sustained growth but also for strategic expansion and greater market impact.
